

UI Testing using Selenium WebDriver – Amazon Test

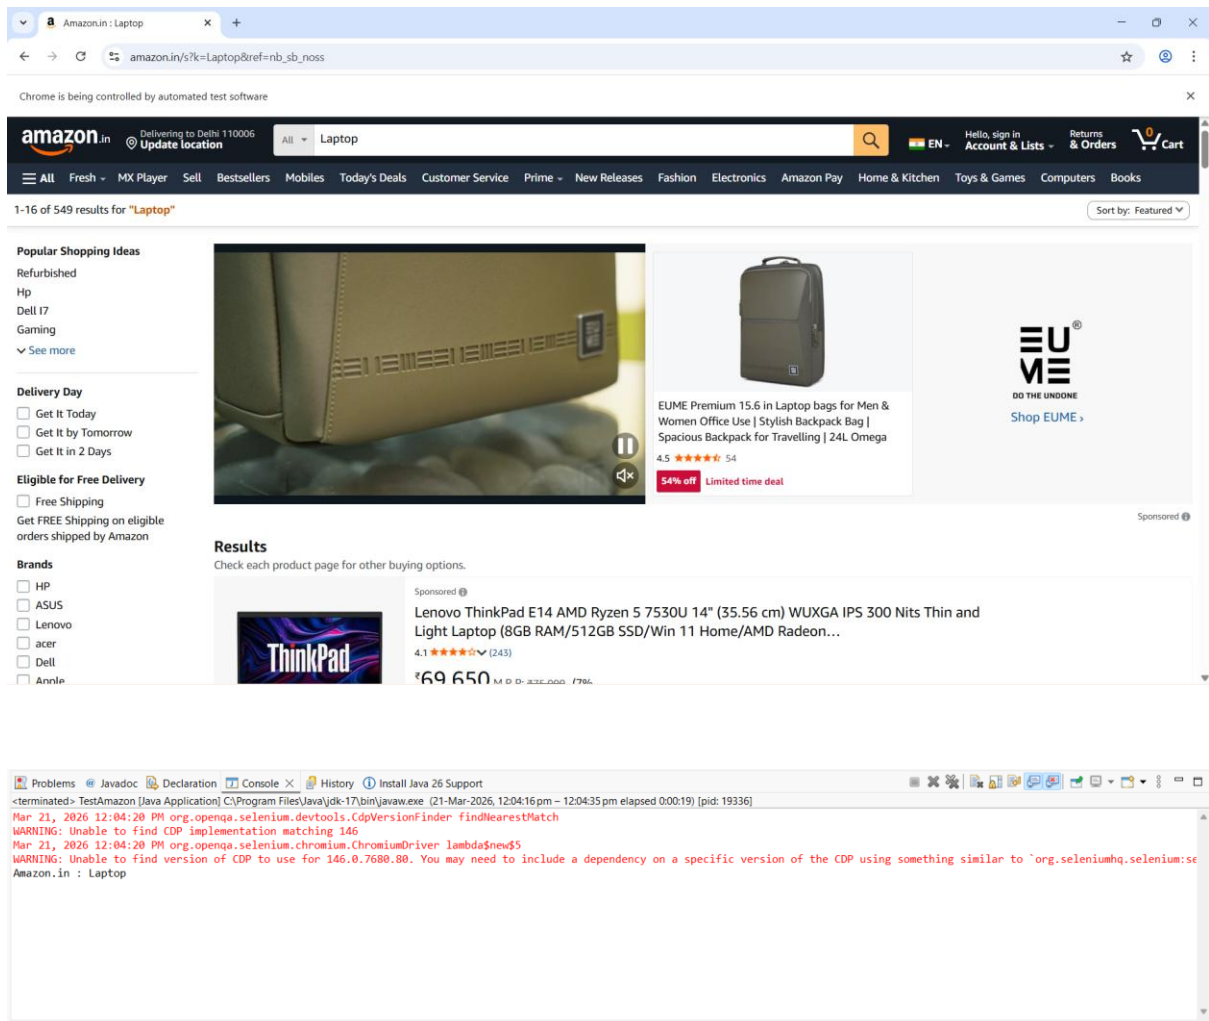

Test Scenario:

1. Open Amazon website
2. Enter product name "Laptop" in search box
3. Click search button
4. Verify results are displayed
5. Print page title in console

Tools Used:

1. Java
2. Selenium WebDriver
3. Maven
4. Git & GitHub

Result:

Test executed successfully. Amazon page opened, product searched, and results displayed correctly.
